Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2636

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

a. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wilkes, Jr. in view of Mardus and Cellier.

Wilkes discloses a mobile broadcast receiving system where information content as well as location data are broadcast comprising receiving equipment 21, equipment for retrieving data specifying area defining location of mobile unit (abstract), comparing present location with received location and outputting the broadcast data when the comparator selects the received data, except for specifically stating that the route of travel is compared to received location data, or that receiver is sensitive in the zenithal direction.

Mardus discloses a mobile broadcast receiving system where information content as well as location data are broadcast comprising receiving equipment (col.6, line 1), equipment for retrieving data specifying area defining location of route of mobile unit (col. 5, lines 67-68), and comparing present route with received location and outputting the broadcast data when the comparator selects the received data (abstract).

Cellier teaches desirability of using a zenith sensitive receiver in a mobile unit receiving system, in order to more clearly receive broadcast data in an urban environment (col. 5, lines 17-28).

It would have been obvious to use route data and zenith oriented receiver as suggested by Mardus and Cellier in a broadcast receiving system as disclosed by Wilkes, in order to provide more comprehensive data regarding the immediate vicinity of a mobile unit, while allowing more precise detection in urban environments, especially when satellite communications were being utilized.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Grant, Duckeck, Pressel, Schmidt and Horita disclose mobile unit receiving systems.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent A Swarthout whose telephone number is 571-272-2979. The examiner can normally be reached on M-F from 6:30 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeff Hofsass, can be reached on 571-272-2981. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
